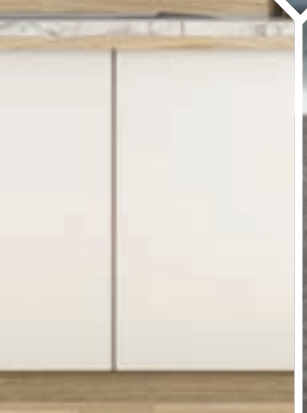
D **BROOKHILL**
IN FUSION

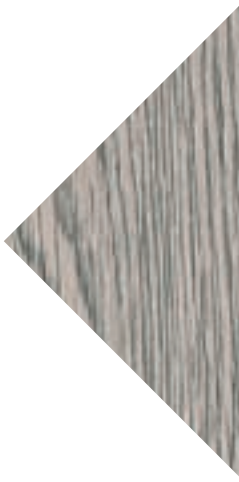
The environment you create around you speaks volumes about you and your personality. Whatever you want to express, we're determined to give you the means to do it perfectly.

WHY CHOOSE MELAWOOD?

With over a hundred and twenty years of history behind us, you can be sure that PG Bison manufactures MelaWood with the kind of technology and know-how that'll guarantee it lasts and lasts. Whether it's a small piece of furniture, your dream kitchen or a whole office block, we've got the right design for you with back-up you can trust. And that means your investment will keep paying dividends for a long time to come.

LET YOUR **INNER STYLE SHOW**

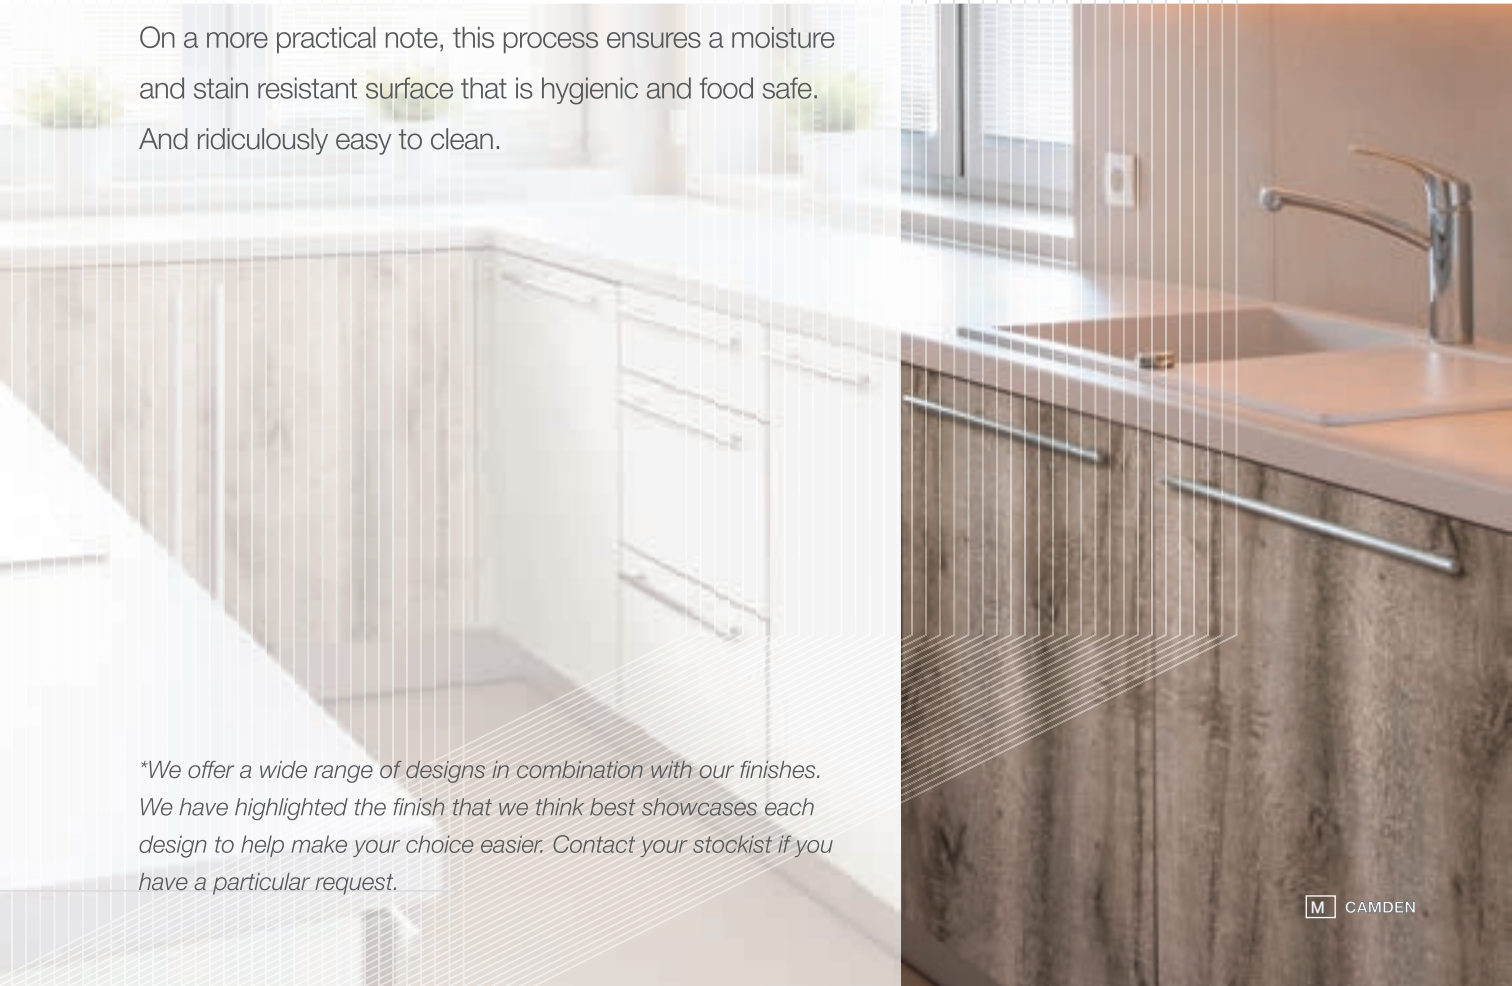




MELAWOOD IS BEAUTIFUL
BUT OH SO TOUGH

Once our designs have been carefully selected, then printed décor paper is saturated with melamine resin. This is fused to our top quality board using heat and pressure, creating a surface tough enough to last a lifetime.

On a more practical note, this process ensures a moisture and stain resistant surface that is hygienic and food safe. And ridiculously easy to clean.



**We offer a wide range of designs in combination with our finishes. We have highlighted the finish that we think best showcases each design to help make your choice easier. Contact your stockist if you have a particular request.*

NATURAL TOUCH

NOT JUST HOW IT LOOKS
HOW IT FEELS

Our experience of an environment is not only visual but textural as well. A high gloss surface gives colours a richer, more vivid look. Conversely, a matt texture absorbs more light so it softens colours and can give a sense of warmth. And of course, an undulating three dimensional texture provides an authentic, warm feel.

Our range of textures and finishes give you complete freedom of choice to express yourself as you like in the most beautiful and practical way.

FUSION – an elegant, matt wood-like effect, using soft, shallow pores to enhance its realism.

LINEAR – combines matt and gloss straight grains to create a lively texture.

NATURAL TOUCH – a soft matt for a luxurious feel.

PEEN – a practical, hardworking, stippled effect.

ASHWOOD – a glossy, debossed woodgrain.
