

Acoustic Panels

*Perforated, slotted or
custom designed patterns*

*Hoop pine, MDF, plywood
or particleboard substrates*

*Timber, melamine, paint,
stain or lime wash finishes*

Evolution Forest Product's extensive range of perforated and slotted panels will meet the needs of any interior aesthetic, with the option to customise patterns and create your own design.

Acoustics + Visual Appeal

Our extensive range of panels and finishes will meet the design requirements of any installation; contemporary or traditional, auditoriums, retail precincts, theatres or company offices. Select lime washes or paint finishes in a multitude of colours, stained timber veneers that showcase the substrate, or melamine finishes in solid colours, woodgrains or patterns.

Panels can be supplied with an acoustic backing material to provide excellent sound absorption.

Substrate Options

Our substrate options include E0, FSC and/or PEFC responsibly sourced, chain of custody certified materials and products certified under the EWPA certification scheme, for quality systems. Select:

- Plywood
- MDF
- Veneered Board
- Melamine
- Particleboard
- Hoop Pine Ply

Providing acoustics solutions with form and function.
